#### **DETAILED ACTION**

# Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 7 & 12-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Donnally et al. (US 5,423,390).

With respect to claims 1, 7 & 12, Donnally et al. disclose a method for raising a pipe section from a horizontal position proximate a deck to alignment with a mast for being connected to a pipeline end comprising:

- providing a main support arm 77 which is pivoted from horizontal to proximately parallel to a mast 28 (FIG. 2);
- providing a main support arm rotational axis 74, 76 parallel to a main support arm;
- providing grabbers 82 mounted on a rotational axis 74, 76;
- engaging a pipe section proximate a deck (FIG. 1);
- rotating grabbers about a rotational axis center 74 from a position below a rotational axis to a second position above a rotational axis;
- pivoting a main support arm 77 and pipe section to a position proximately parallel to a mast;

Art Unit: 3652

 and extending a pipe section away from a rotational axis 74, 76 in a radial direction. (FIGS. 5-6)

With respect to claim 2, Donnally et al. disclose extending grabbers are extended to a first position to engage a pipe section proximate a deck.

With respect to claim 3, 13, Donnally et al. disclose retracting grabbers G are retracted to a third position (Fig. 4) closer to a rotational axis than said first position prior to rotating said grabbers about a rotational axis to said second position.

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 4-6, 8-11 & 14-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Donnally et al. (US 5,423,390) in view of Oliver (US 4,738,321).

With respect to claims 4, 8-9, 14-16, Donnally et al. disclose moving a pipe section from a second position to a fourth position and do not disclose using a scissor mechanism. Oliver discloses a scissor mechanism 34, 36, 38 which improves on the handling of heavier tubular sections and improves on guidance over previously known grabbers. C1-2. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the method of Donnally et al. to include using a scissor mechanism, as per the teachings of Oliver, to improve on accuracy of placement of a tubular at a well head.

Art Unit: 3652

With respect to claim 5, 10, 17, Donnally et al. disclose the use of force parallel to rotational axis to extend and retract using a scissor mechanism.

With respect to claim 6, 11, 18, Donnally et al. disclose hydraulic cylinders.

## Response to Arguments

Applicant's arguments with respect to claims 1-18 have been considered but are most in view of the new ground(s) of rejection.

#### Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gregory W. Adams whose telephone number is (571) 272-8101. The examiner can normally be reached on M-Th., 8:00-5.

Art Unit: 3652

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gene Crawford can be reached on (571) 272-6911. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
